## Bistro

Cafés and casual spaces have earned their spot in the front of buildings and are now the first place people experience your organization. A stunning, unique wraparound 3D veneer outer nestled into a finely upholstered inner back is an incredible way to say *Welcome!* Bistro now offers the warmth and beauty of wood through a collection of seating and occasional and standing height tables. Walnut, oak and beech choices present rich tones and modern naturals for a palette of design expressions.
