

Product

Is Mile Marker veneer or laminate?

Mile Marker's chassis are Thermally-Fused Laminate (TFL) and tops can be specified as either High-Pressure Laminate (HPL) or solid surface.

How is Mile Marker shipped?

Prior to shipping each unit is cleaned, covered with environmentally responsible micro-foam and placed into a cardboard furniture carton and then tagged for shipment.

Can Mile Marker be customized?

Mile Marker can be customized with different size chassis, standard or wall-hanging base cabinets, and sloped or flat tops on uppers and storage cabinets. Any of our standard laminate wood grains and solid colors can be specified. There are four options for pulls, as well as three options for hinges. Any configurations that cannot be created with standard product can be manufactured as a special product.

Can Mile Marker go with other Carolina products?

Mile Marker's wood grain laminate options all have matching Carolina standard wood finish companions, so they can easily match any Carolina product that is specified.

Does Mile Marker offer fabric, glass or resin panels?

Mile Marker does not offer fabric, glass or resin panels standard, but these can all be quoted as specials for any product.

How is Mile Marker electrified?

Electrical components can be pulled through bases, back panels, and flat or raised wall panels.

What different environments does Mile Marker fit into?

Mile Marker is a comprehensive offering of modular cabinetry and casework that is ideal for any area where traditional millwork would be specified.

Listed below are some of the environment possibilities that Mile Marker can fit into:

- Reception
- Waiting Areas
- Decentralized Nurse's Stations
- Centralized Nurse's Stations
- Exam Rooms
- Patient Head Walls
- Patient Foot Walls
- Bathrooms
- Treatment Bays
- Labs
- Breakrooms

What advantages does Mile Marker have over a typical millwork system?

Modular cabinetry and casework, like Mile Marker, is easier and faster to design, order, and install than traditional millwork. Casework is movable and easier to adapt to different working environments. Casework also costs less than traditional millwork and fewer changes have to be made due to the many options available.

Marketing

How will designers benefit from Mile Marker?

Mile Marker's broad product line allows designers to have the ability to create the best design for any space within a healthcare facility. The comprehensive price book gives step-by-step instructions to make the ordering process quick and simple.
