

Rein+ seating and occasional tables share a distinctively modern aesthetic. The streamlined forms and purposefully minimal details make the collection versatile and efficient. Carolina has also developed innovative, high-value methods to maintain necessary properties, like strength, cleanability, and durability.

The broad offering of standard features and options allows Rein+ to be scaled to suit your current needs, as well as future change.

Our experienced healthcare team at Carolina works closely along side The OFS Design Studio. This collaboration of dynamic backgrounds and geographic origins among industrial design and engineering teammates brings to life the most patient-centered product solutions the healthcare industry has to offer. Pencil sketches, 3D printed

parts and rough prototypes serve as the journey to fine tune the last 10% so that patients, and the people caring for them can experience the difference between good design and great design. Our goal is to deliver design value in a very intentional way where healthcare products are simple, personal and purposeful.
