

Flexibility and efficiency

Today, more than ever caregivers require the proper tools and support to help them connect positively with their patients. Opportunities for conversation, exploration, and discovery lead caregivers and patients toward better outcomes. The Stray physician stool and mobile work table empower caregivers with flexibility and efficiency in their daily delivery of care.

Statement of line

Our experienced healthcare team at Carolina works closely along side The OFS Design Studio. This collaboration of dynamic backgrounds and geographic origins among industrial design and engineering teammates brings to life the most patient-centered product solutions the healthcare industry has to offer. Pencil sketches, 3D printed parts and rough prototypes serve as the journey to fine tune the last 10% so that patients, and the people caring for them can experience the difference between good design and great design. Our goal is to deliver design value in a very intentional way where healthcare products are simple, personal and purposeful.
