Kintra assembly instructions
Important safety instructions

When using an electrical furnishing, basic precautions should always be followed, including the following:

This furnishing is made for commercial use only.

Read all instructions before using this furnishing:

**DANGER**
To reduce the risk of electrical shock:
1. Always unplug this furnishing from the electrical outlet before cleaning.

**WARNING**
To reduce the risk of burns, fire, electric shock, or injury to persons:
1. Unplug from outlet before putting on or taking off parts.
2. Close supervision is necessary when this furnishing is used by, or near children, invalids, or disabled persons.
3. Use the furnishing only for its intended use as described in these instructions.
   Do not use attachments not recommended by the manufacturer.
4. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped in water. Return the furnishing to a service center for examination and repair.
5. Keep the cord away from heated surfaces.
6. Do not use outdoors.
7. Use only SJT 18 AWG cord.

To reduce the risk of electric shock, this furnishing has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

**Note** – servicing is only to be performed by an authorized representative.

**Servicing of double-insulated products**

In a double-insulated product, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated product, nor is a means for grounding to be added to the product. Servicing a double-insulated product requires extreme care and knowledge of the system, and is to be done only by qualified service personnel. Replacement parts for a double-insulated product must be identical to the parts they replace. A double-insulated product is marked with the words “DOUBLE INSULATION” OR “DOUBLE INSULATED”. The symbol (square within a square) is also able to be marked on the product.

Save these instructions
Kintra table tops will be shipped in one of these ways:

No shelf option

With shelf option

STEP 1
1. Place top, face side down, on a non marring surface.
2. Remove shipping screws from bottom covers and place bottom covers to the side.

84” or larger table

STEP 1 (shelf option)
1. Place top, face side down, on a non marring surface.
2. Remove shipping screws from shelf bottom and place to the side.
3. Remove shipping screws from shelf assembly and place to the side.
Installation (Continued)

STEP 2

1. Connect end panels to top by pressing mitered edge of end panel to the mitered edge of top.

2. Use 12 (per leg) #8 x 1½” pan head screws (HK-15) to secure table legs to top.

IMPORTANT!!

Tops and ends are in numbered sets. The numbers are on the angled faces of the tops and ends. The number on the end MUST match the number on the top. DO NOT switch ends.

Use four (4) #8 x 1½” pan head screws to screw support beams to ends (both ends) (HK-15).

On 42” tall versions (KTH) use ten (10) ½-16 X 1 hex head bolts to attach support beam brackets to ends (both ends) (HK-147).
Installation (Continued)

STEP 3
1. Replace bottom covers and secure with #8 x ¾” flat head screws (HK-53).
2. Flip table over and place in desired location.

STEP 3 (shelf option)
1. Replace shelf assembly and screw to top.
2. Use #8 x ¾” flat head screws (HK-53) on cover panels.
3. Use #8 x 2” pan head screws (HK-92) on divider panels.
4. Use #8 x 1¼” flat head screws (HK-48) to screw trough to shelf assembly back panel.
5. Replace shelf bottom and use #8 x 1¼” flat head screws (HK-48) to screw shelf bottom to shelf assembly.
6. Insert shelf supports into pre-drilled holes in end panels (see detail). Use # 6 x ½” flat head screws (HK-134) to secure.
