

Noho Move™ chair

# Noho Move™ chair

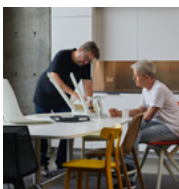

Built with movement in mind, Noho Move will feel at home in a variety of spaces from meeting and focus rooms to social areas. In fact, three systems work together to provide exemplary ergonomic comfort: the dynamic auxetic shell, intuitive under-seat mechanism, and recline structure. These three design elements combine to respond to every activity and posture, eliminating pressure points and improving the body's circulation. Plus, the chair is made from environmentally sensitive materials, transforming reclaimed fishing nets, end-of-life-carpets, and other recycled materials into a purposeful design that is better for you and the planet.
