

# Living Wall Planter

# Living Wall Planter

Eco-friendly technology and biophilic design collide to create a flexible living wall that is a simple, pre-built system for live plants in the workplace. Providing many health, wellness, and climate benefits, living walls create cooler microclimates, decrease the ambient temperature, improve local air quality, reduce CO2 and noise levels, and contribute to urban biodiversity. By incorporating biophilia into office design, we can create greener and more sustainable workplaces.

## Thought starters

OFS Design Studio

The OFS Design Studio represents a collaborative effort of dynamic backgrounds and geographic origins among industrial design and engineering teammates with one thing in mind...people. Pencil sketches, 3D printed parts and rough prototypes serve

as the journey to fine tune the last 10% so that people can feel the difference between good design and great design. Our goal is to deliver design value in a very intentional way where products are simple, personal and purposeful.
