

Living Wall Planter

Eco-friendly technology and biophilic design collide to create a flexible living wall that is a simple, pre-built system for live plants in the workplace. Providing many health, wellness, and climate benefits, living walls create cooler microclimates, decrease the ambient temperature, improve local

air quality, reduce CO2 and noise levels, and contribute to urban biodiversity. Here at OFS, we believe that by incorporating biophilia into office design, we can create greener and more sustainable workplaces, sparking creativity and connectivity.
