

Zonal

Zonal

Zonal was crafted for the human form. Studying body movement, designer Justus Kolberg, developed Tuun Technology where independent linear supports in the back frame move in tandem with the user as they change postures throughout the day. To further fine tune the sit, Zonal features a body balance mechanism, adjustable lumbar support, seat depth movement, and 4D pivoting arms. Zonal empathizes with user needs with a simple, highly functional seating interface.

Thought starters

Justus Kolberg

Known for their functionality, confidence, and discretion, Justus Kolberg's chairs have distinguished him as one of the most sought-after furniture designers in Europe.

The Hamburg-based designer believes that chairs should silently serve the needs of users, putting them at ease and allowing cooperative work.
