Overview

- Refer to [Room Collection building blocks](#) for model information.
- Minimum height is 92.5"
- Beams allow for 1.5" of leveling (94" maximum height).
- The Room Collection includes 10' of usable power cord with a 3-prong plug end (NEMA 5-15P).
- The units have an NIC rating of 31dB for sound reduction.
- Cantilevered tables are included in the structure model; all other furniture is ordered separately.

When specifying a model, follow this sequence:

1. Choose a model based on footprint, lower panel design, entry side, and main power side.
2. Specify the structure (powder coat finish, carpet, and roof details)
3. Configure the entry side (door position, door swing, door details)
4. Configure remaining sides from left to center to right (when viewed facing the entry from outside the unit)
5. Finish by placing furniture and any add-ons

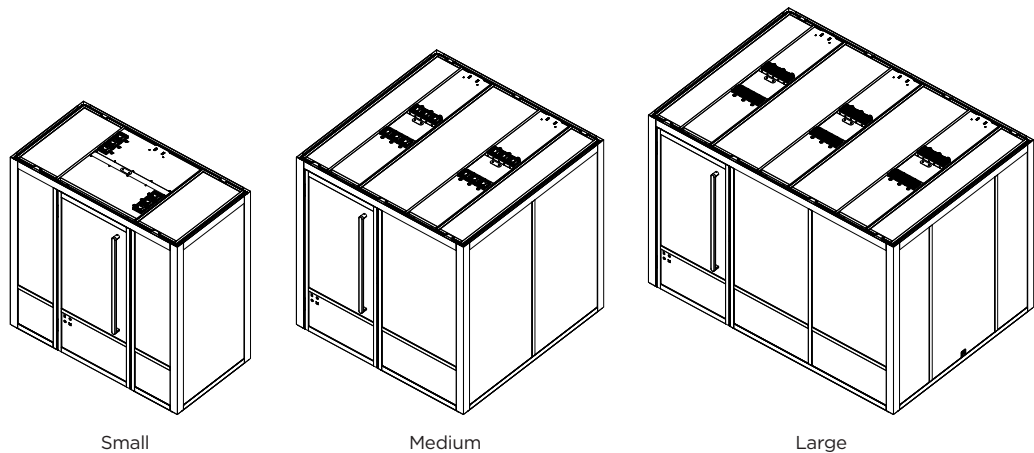

Models

Configuring a Room Collection unit begins by choosing a model. This selection determines four key factors: Room Size, Entry Side, Power Wall Side, and Lower Panel Config. The choice in each of the four categories determines which model you select. Instructions for selecting the model are as follows:

Room Size

Select one of the footprints below.

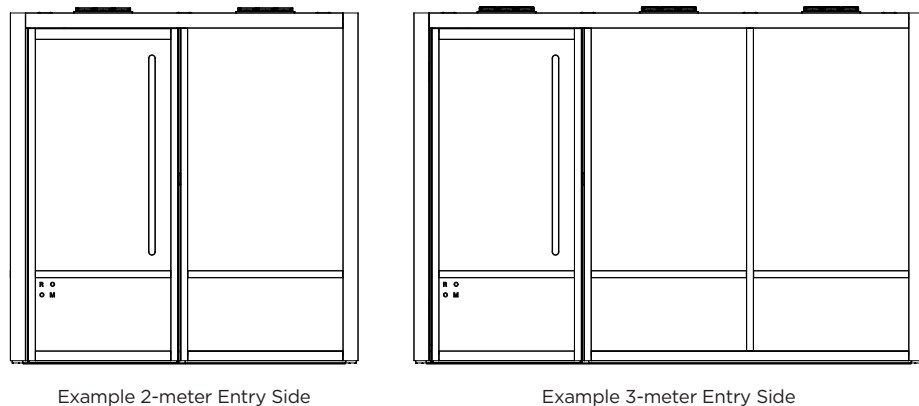

- [S] Small: 90.6" x 47.2" (230cm x 120cm)
- [M] Medium: 90.6" x 90.6" (230cm x 230cm)
- [L] Large: 132.9" x 90.6" (337.5cm x 230cm)

Entry Side Location

This defines the location of the entrance to the unit and is only relevant for the Large footprint, where the entry can be placed on either the 2-meter or 3-meter side. Door location and swing options are specified later.

- [2] 2-meter Entry Side
- [3] 3-meter Entry Side

Power Wall Side Location

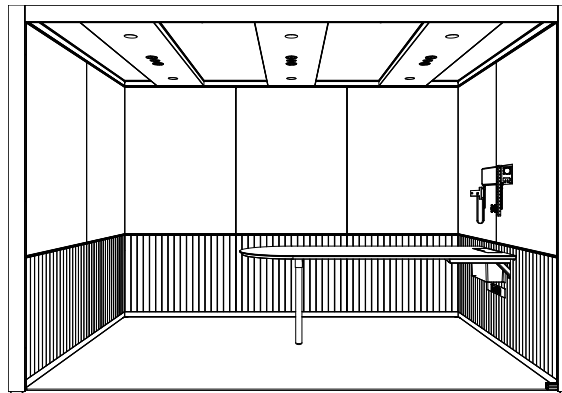

Typically, the Power Wall side is where the power cord enters the unit, closest to a building wall outlet or most hidden in the space. The Power Wall side must have an interior receptacle and a cable infeed grommet. This ensures that every unit is built with at least one entry and one receptacle.

For rooms with an attached table, the Power Wall Side is always the side with the table. You may add additional infeed grommets and receptacles on other sides.

Facing the entry from the outside of the unit, select from the following options:

- [L] Left Power Wall
- [C] Center Power Wall*
- [R] Right Power Wall

*Room Small (Room S) supports only a Center Power Wall.

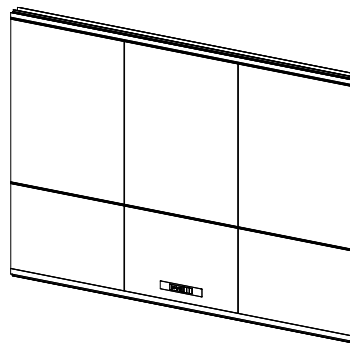

Typical Room Large unit, Door/Window not shown

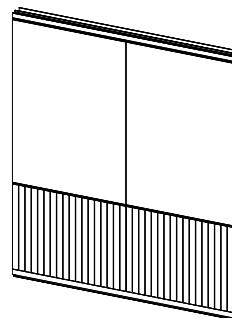

Lower Panel Config

In the Room Collection, upper walls always feature upholstered panels. Lower sections can be specified with upholstered panels or tambour. This selection applies to the entire unit. Rooms with attached tables can only be specified with tambour. Select from the following options:

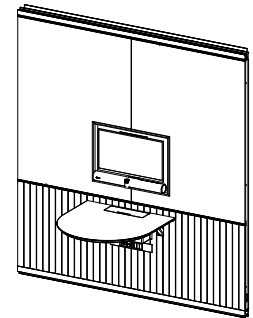

- [U] Upholstered
- [T] Tambour

Upholstered 3-meter side

Tambour 2-meter side

Tambour 2-meter side with Table

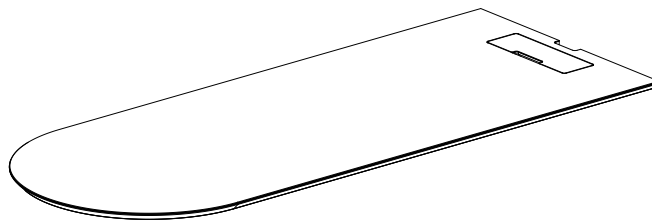

Table Option

The final model selection is whether an attached table is included in the overall structure. Table sizes (if available) and details are selected later. This selection has the following rules, namely:

- Tables can only be selected if [T] tambour is selected
- Tables always attach to the Power Wall side
- Tables cannot be attached to the 3-meter sides of the Large footprint
- Tables can only be attached to the back 2-meter wall of the Small footprint

Select one:

- [Y] Yes, table
- [N] No, table

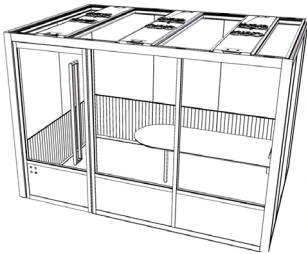

Typical Large Table shown

Selecting Your Starting Model

Select your starting model by combining your choices from this section.

Line	-	Footprint / Entry Side	-	Main Power Side	Lower Panel Config	Table
RCC	-	[S] Small [M] Medium [L2] Large, 2-meter entry [L3] Large, 3-meter entry	-	[L] Left [C] Center [R] Right	[U] Upholstered [T] Tambour	[Y] Yes [N] No

Here are a few example models:

RCC - L 3 - R T Y

Room Collection Configurable Prefix Large with Entry on 3-meter side Main Power Side - Right Lower Panel Config - Tambour Table - Yes

RCC - M - C U N

Room Collection Configurable Prefix Medium Main Power Side - Center Lower Panel Config - Upholstered Table - No

The full list of 27 models is as follows:

RCC-S-CTY	RCC-M-LTY	RCC-L2-LTN	RCC-L3-LTY

	RCC-M-RTY	RCC-L2-RUN	RCC-L3-RTN
	RCC-M-RTN		RCC-L3-RUN
	RCC-M-RUN		

Structure

Once a model is selected, the structure can be configured. These overarching selections are independent of the side specifications and influence the options available for each side of the product.

Finish

Structure Finish Options:

[RWHT] - Off White

[RANT] - Anthracite

*This selection determines the color and finish of the aluminum beams as well as the doors and windows.

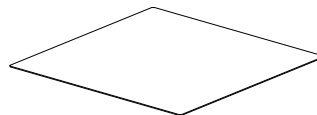

Carpet

Carpet Options:

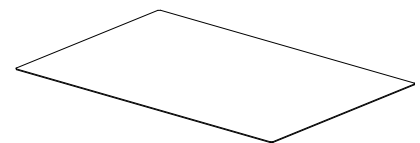

- [DRKG] Dark Grey

Room S Carpet

Room M Carpet

Room L Carpet

*Carpet dimensions are predetermined by the selected Room size. Removing the carpet may affect ADA compliance.

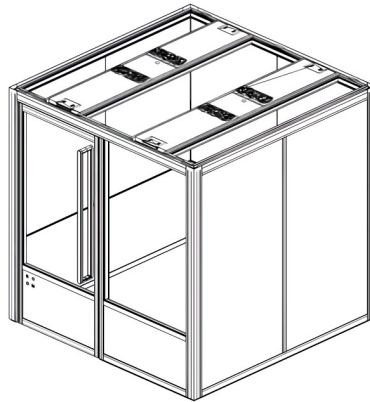

Roof Detail Options:

- [SKYC] - Skylight, Clear

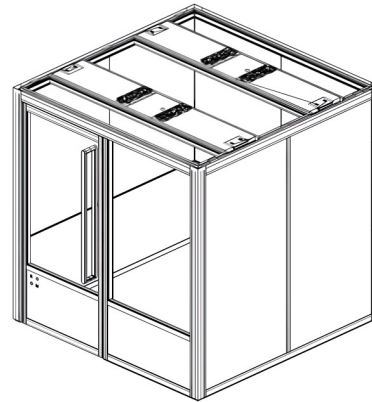

Roof Orientation Options*:

- [PEDE] - Perpendicular (The length of the solid roof panels runs perpendicular to the entry)
- [PARL] - Parallel (The length of the solid roof panels runs parallel to the entry)

*This option only applies to the Medium footprint.

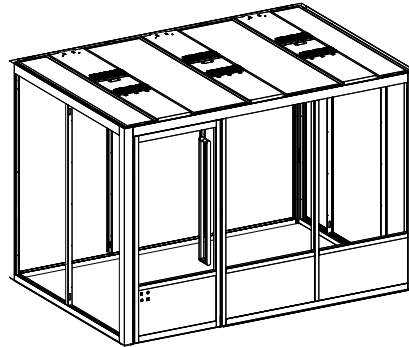

Room M with Perpendicular Roof

Room M with Parallel Roof

Entry Side

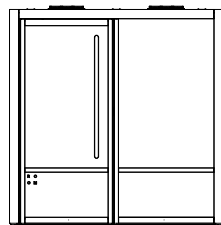

The entry side is available in 2-meter and 3-meter widths. Within each, multiple door specifications are possible.

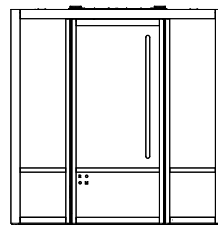

Door Location

Doors can be positioned in one of three locations on both the 2-meter and 3-meter entry sides:

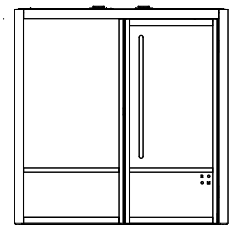

- [DLLT] - Left
- [DLCT] - Center
- [DLRT] - Right

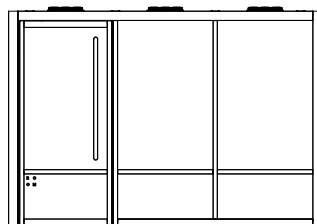

Left Door on 2-meter side

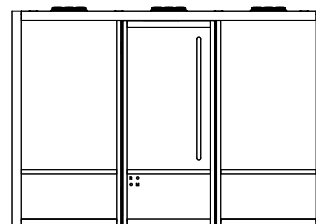

Center Door on 2-meter side

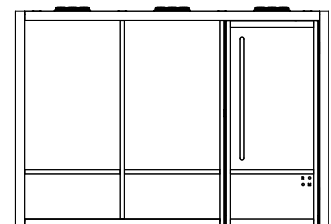

Right Door on 2-meter side

Left Door on 3-meter side

Center Door on 3-meter side

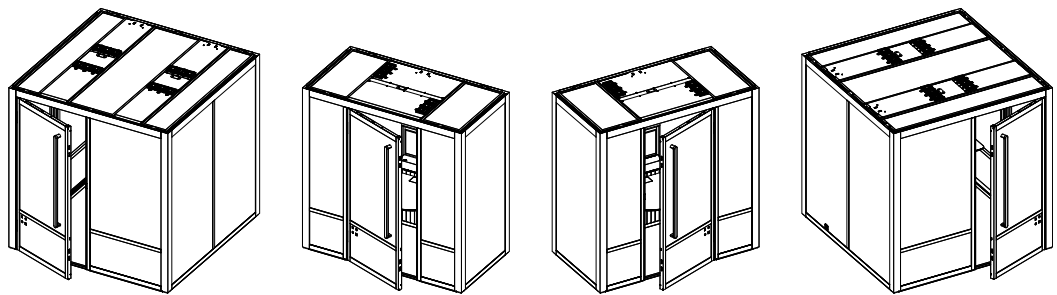

Right Door on 3-meter side

Door Hinge

Doors always swing outward from the unit. Handedness can be specified. For simplicity, door swing is referred to by the side of the hinges when facing the unit.

Centered doors can be specified with hinges on the left or right, while doors against a corner post must hinge on that corner post to create space for the light switch.

- [DHLT] - Hinge on Left (Not available with DLRT)
- [DHRT] - Hinge on Right (Not available with DLLT)

Left Door - Left Hinge

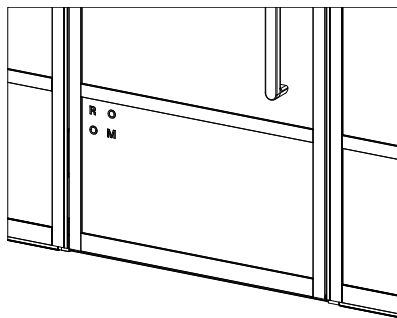

Center Door - Left Hinge

Center Door - Right Hinge

Right Door - Right Hinge

Door/Window Detail Options:

- [PNLD] - Paneled, Clear

Lock Option:

- [X9] - None

Door Handle Finish:

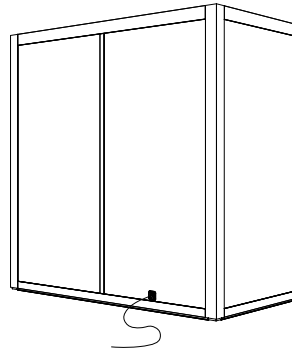

- [Oak] - White Oak

A Note on Specifying Sides

The following sections explain how to specify full sides of the units. Not all sections are used on every unit. Some sections may be used twice and the order in which they are used depends on your model choice. Walls are always specified from left to center to right when viewing the unit from outside, facing the entry.

Power Wall Side

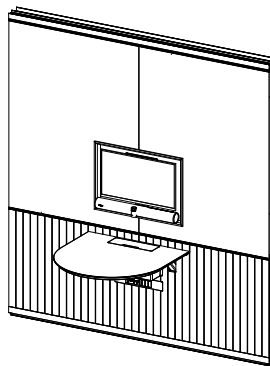

The Power Wall side must consist of solid wall panels. It is typically where the power cord enters the unit. If a table is included, it must attach to this side; however, the power cord may enter elsewhere.

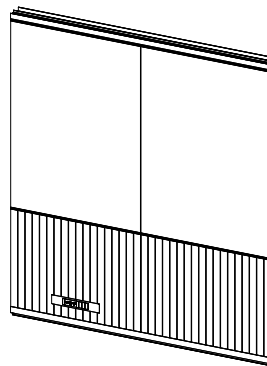

Example 2-meter Power Entry Side shown (exterior view)

The power wall side options support the following configurations:

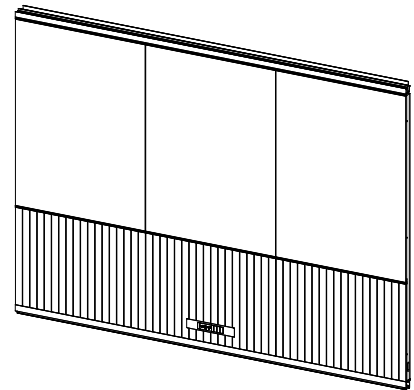

- 2-meter Electrical Wall with Table (only available with tambour lower panels)
- 2-meter Electrical Wall (available with tambour or upholstered lower panels)
- 3-meter Electrical Wall (available with tambour or upholstered lower panels)

Example 2-meter Electrical Wall with Table

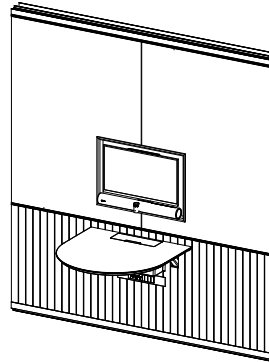

Example 2-meter Electrical Wall

Example 3-meter Electrical Wall

2-meter Electrical Wall with Table

Table wall options are only available on 2-meter Power Wall Sides.

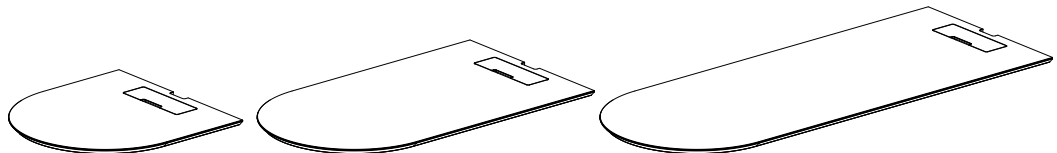

Small table shown

Table Configurations

Table Size:

- SMALL - Small
 - Available on any 2-meter Electrical Wall with Table
- MEDIUM - Medium
 - Available on Medium footprint, centered 2-meter Electrical Wall with Table
 - Available on Large footprint, any 2-meter Electrical Wall with Table
- LARGE - Large
 - Available only on Large footprint, any 2-meter Electrical Wall with Table

SMALL Table

MEDIUM Table

LARGE Table

Table Finish Options

Table Finish:

- PEWTER - Pewter
 - Recommended to contrast with Off White structure finish
- PEBBLE - Pebble
 - Recommended to contrast with Anthracite structure finish

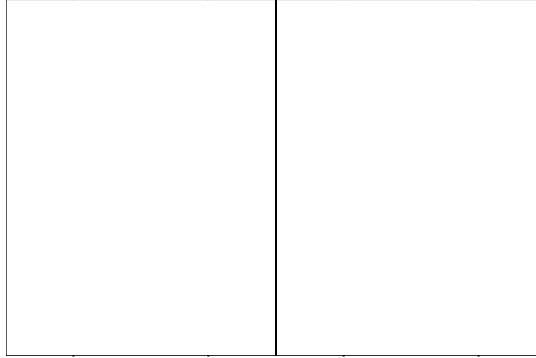

PEWTER

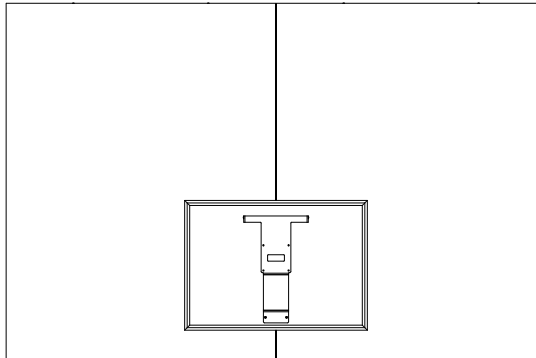

PEBBLE

Table Wall Side - Upper Panel Options:

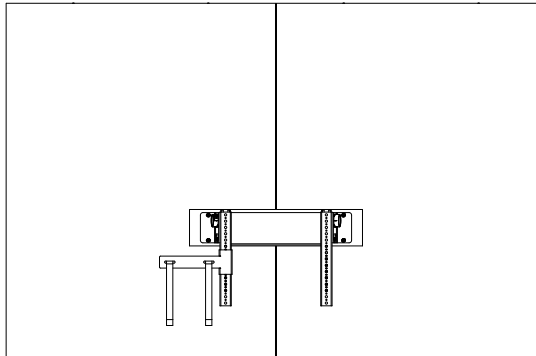

- [2UFSS] - Standard (No monitor cutouts)

- [2UFFF] - Small Monitor Frame (includes oak monitor frame and mount for monitor and camera)

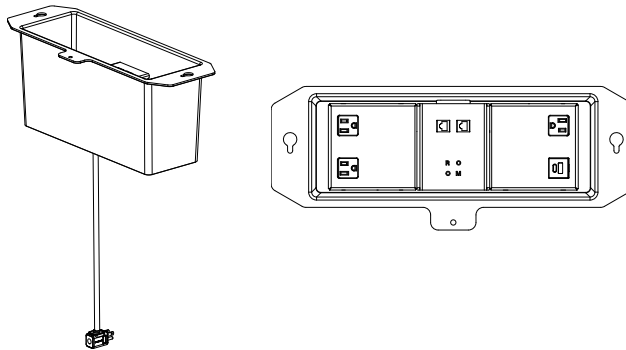

- [2UFMM] - Large Monitor Mount (includes VESA-compatible large monitor mounting bracket)

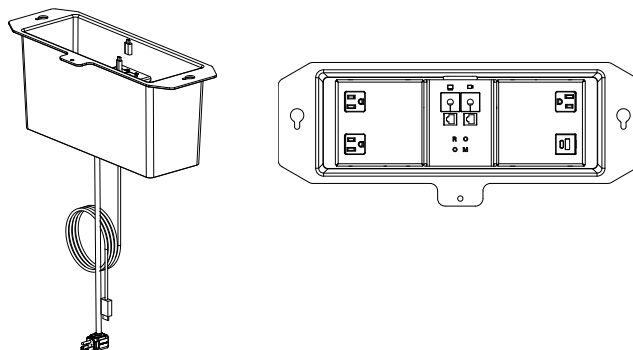

Power Box Options:

- [SPWR] - Standard Power Box (no grommets or pre-routed cords). Choose this if:
 - No monitor will be mounted.
 - An all-in-one video conferencing solution without a wired connection for laptops will be mounted.

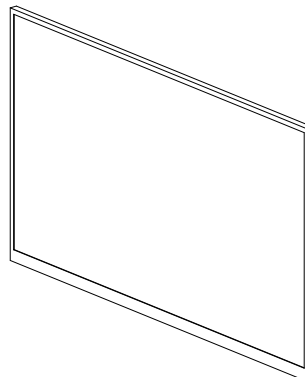

- [VCPWR] - Video Conferencing Power Box (includes grommets with pre-routed USB-C/HDMI and USB-C/USB-C cords). This option is only selectable with [2UFFF] and [2UFMM]. Choose this if:
 - ROOM's Monitor/Camera solution will be used inside the Small Monitor Mount.
 - A customer-supplied video conferencing solution would benefit from a wired connection for laptops.

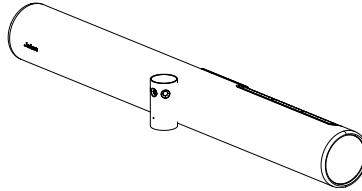

Monitor Options:

- [X9] - None
- [WTV] - 27" HD Samsung monitor
 - Only available, and strongly recommended, with the Small Monitor Frame [2UFFF]. The mount included with [2UFFF] is designed for this exact monitor. Fit and alignment are not likely with other monitors because the vertical location of 100x100 VESA hole patterns varies significantly by brand and model.

Camera Options:

- [X9] - None
- [WCM] - Jabra PanaCast 50 Webcam, Speaker, and Microphone (#8200-232)
 - Only available, and strongly recommended, with the Small Monitor Frame [2UFFF]. The mount included with [2UFFF] is designed for this exact camera. Fit will not work with any other cameras. This camera stitches together 3 separate camera feeds using an onboard computer to capture all occupants through a true 180-degree field of view.

Upper Panel Textile MFG Options:

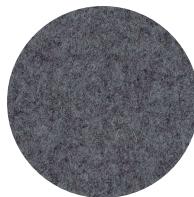

- Camira

Upper Panel Textile Color Options:

- Blazer, Fairfield
 - Recommended to coordinate with Off White structure finish

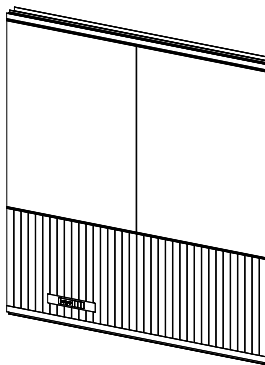

- Blazer, Aberlour
 - Recommended to coordinate with Anthracite structure finish

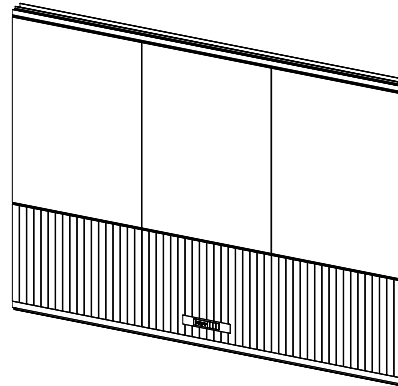

2-meter / 3-meter Power Wall Side

The Power Wall side must have an interior receptacle and a cable infeed grommet. It includes the following specification options:

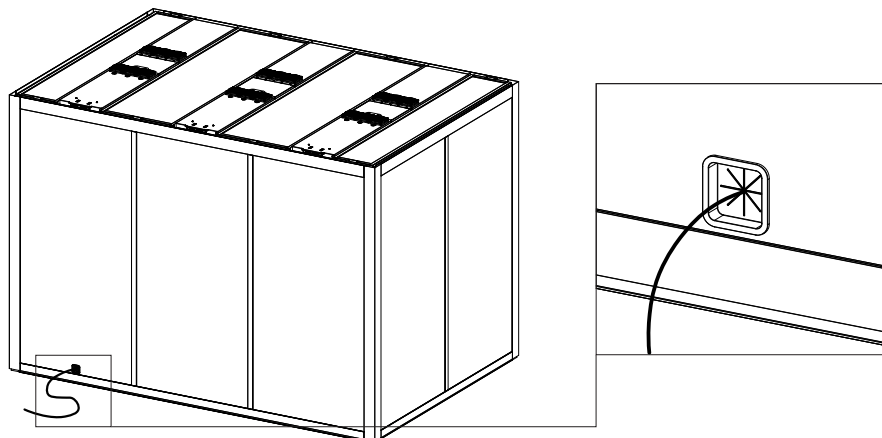

Example 2-meter Power Wall

Example 3-meter Power Wall

Wall Infeed

Remember, all walls are specified as viewed from outside the unit, facing the entry. Left and Right refer to interior directions and are reversed when viewed from the outside the unit.

*Typical 3-meter Electrical Wall with Infeed on Right
**(exterior view shown)

Wall Infeed selection determines two things:

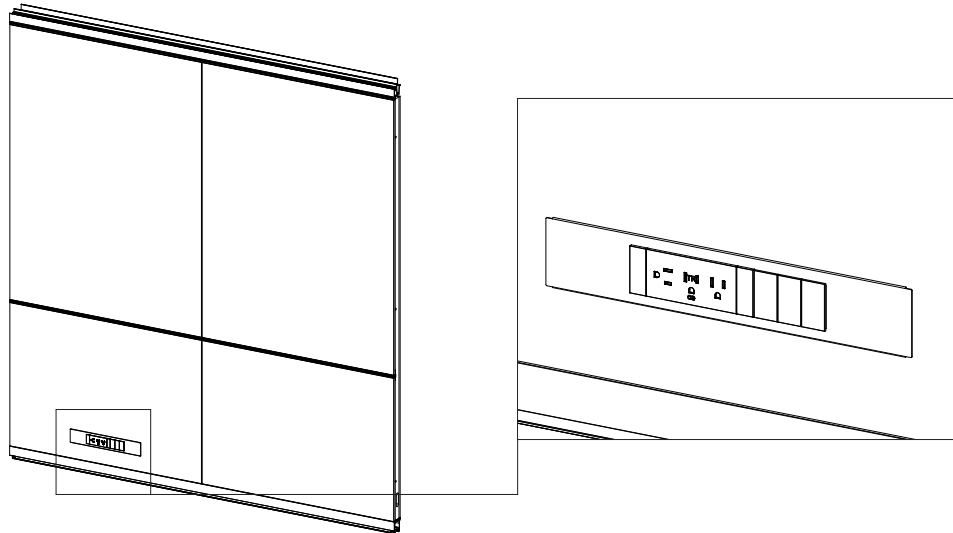

1. The number and location of walls used to route power or data into and out of the room.
2. The walls to which the Large Monitor Mount can be attached. The Large Monitor Mount can be attached centered on a single Infeed Wall, or split across two Infeed Walls.

Infeed Options:

- 2-meter Electrical Wall
 - [EGL] - Left
 - [EGR] - Right
 - [EGB] - Both
- 3-meter Electrical Wall
 - [EGL] - Left
 - [EGLR] - Left/Right
 - [EGLC] - Left/Center
 - [EGR] - Right
 - [EGRC] - Right/Center
 - [EGC] - Center
 - [EGA] - All 3

Power Receptacles

Power receptacles are modules mounted on the interior lower panel. Each module provides three AC power outlets and had three available keystone ports.

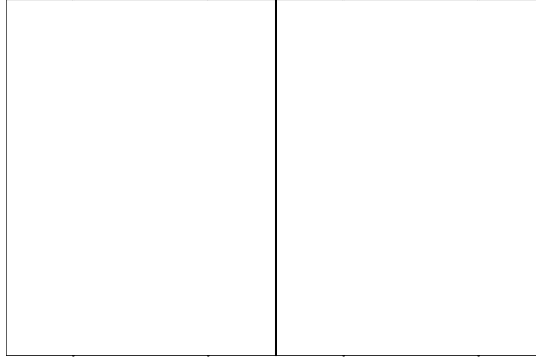

**Typical 2-meter electrical wall with upholstered lower panels and a power receptacle on the left*

Receptacle Options:

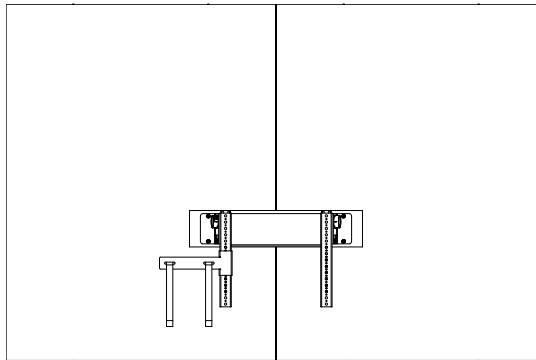

- 2-meter Electrical Wall
 - [TGL] - Left
 - [TGR] - Right
 - [TGB] - Both
- 3-meter Electrical Wall
 - [TGL] - Left
 - [TGLR] - Left/Right
 - [TGLC] - Left/Center
 - [TGR] - Right
 - [TGRC] - Right/Center
 - [TGC] - Center
 - [TGA] - All 3

2-meter Power Wall Side - Upper Panel Options:

- [2UFSS] - Standard (No monitor cutouts)

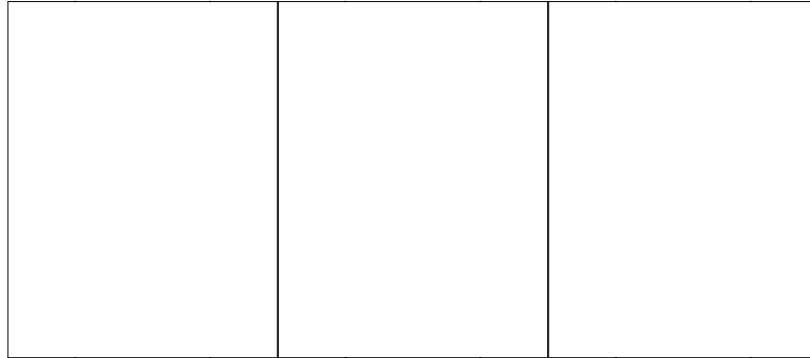

- [2UFMM] - Large Monitor Mount (includes VESA-compatible large monitor mounting bracket)

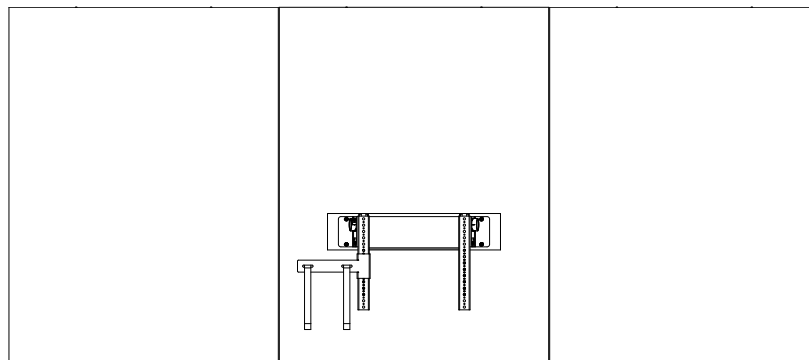

3-meter Power Wall Side - Upper Panel Options:

- [3UFSSS] - Standard (No monitor cutouts)

- [3UFSCS] - Large Monitor Mount (includes VESA-compatible large monitor mounting bracket). This can only be selected if [EGLC], [EGRC], [EGC], or [EGA] is selected)

Upper Panel Textile MFG Options:

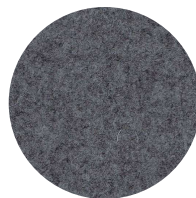

- Camira

Upper Panel Textile Color Options:

- Blazer, Fairfield
 - Recommended to coordinate with Off White structure finish

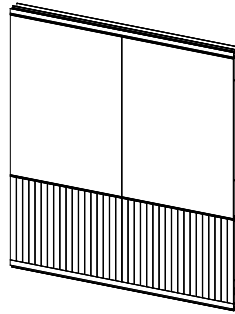

- Blazer, Aberlour
 - Recommended to coordinate with Anthracite structure finish

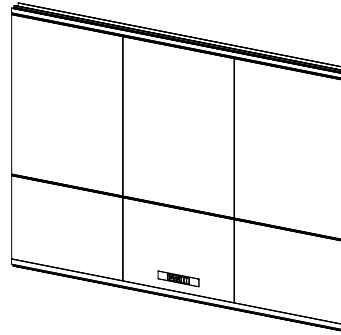

Standard Wall Side

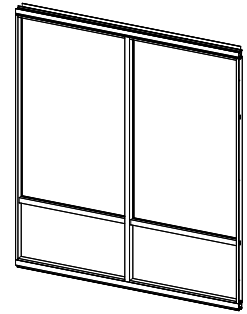

Standard Wall sides may include interior receptacles and cable infeed grommets, but they are not required. This creates additional specification options, including:

*Example 2-meter
Standard Tambour Wall*

*Example 3-meter Upholstered
Wall with Infeed*

*Example 2-meter
Window Wall*

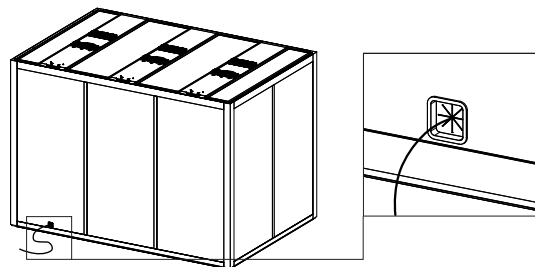

Wall Type

- [WLS] - Standard
 - Two or three standard wall panels, where the only additional specification is textile color.
- [WLF] - Infeed
 - Combination of two or three standard and electrical wall panels with additional specifications.
- [WLW] - Window
 - Two or three windows with no entry.

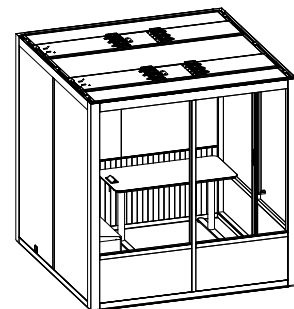

The next two categories are shared across the three wall types. Each option is selectable for only one wall type.

Wall Infeed / Glass

Remember, all walls are specified as viewed from outside the unit, facing the entry. Left and Right refer to interior directions and are reversed when viewed from the outside the unit.

**Example 3-meter Electrical Wall with Infeed on Right
**(exterior view shown)*

**Typical 2-meter Window Wall*

Wall infeed selection determines two things:

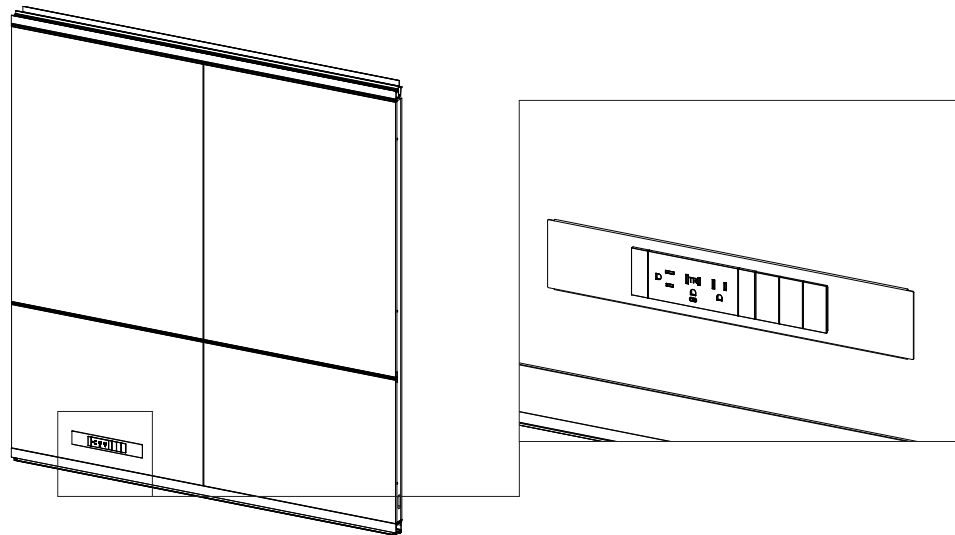

1. The number and location of walls used to route power or data into and out of the room.
2. The walls to which the Large Monitor Mount can be attached. The Large Monitor Mount can be attached centered on a single Infeed Wall, or split across two Infeed Walls.

Wall Infeed / Glass Options:

- 2-meter Standard Wall
 - [X9] - None (Automatically selected if WLS is selected)
 - [EGL] - Left (Only available if WLF is selected)
 - [EGR] - Right (Only available if WLF is selected)
 - [EGB] - Both (Only available if WLF is selected)
 - [EG4] - 3/4 Glass (Automatically selected if WLW is selected)
- 3-meter Standard Wall
 - [X9] - None (Automatically selected if WLS is selected)
 - [EGL] - Left (Only available if WLF is selected)
 - [EGLR] - Left/Right (Only available if WLF is selected)
 - [EGLC] - Left/Center (Only available if WLF is selected)
 - [EGR] - Right (Only available if WLF is selected)
 - [EGRC] - Right/Center (Only available if WLF is selected)
 - [EGC] - Center (Only available if WLF is selected)
 - [EGA] - All 3 (Only available if WLF is selected)
 - [EG4] - 3/4 Glass (Automatically selected if WLW is selected)

Wall Receptacle / Glass

Power receptacles are modules mounted on the interior lower panel to provide 3 AC power outlets and 3 available keystone ports.

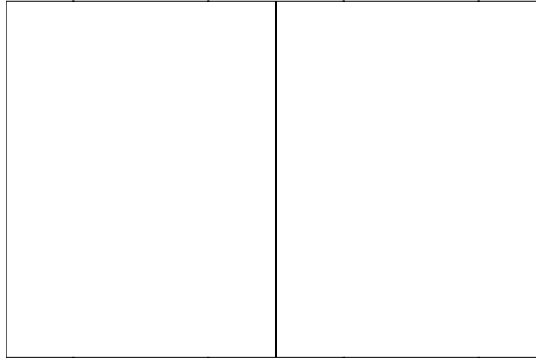

**Typical 2-meter Electrical Wall with Upholstered Lower Panel with Power Receptacles on the Left*

Wall Receptacle / Glass Options:

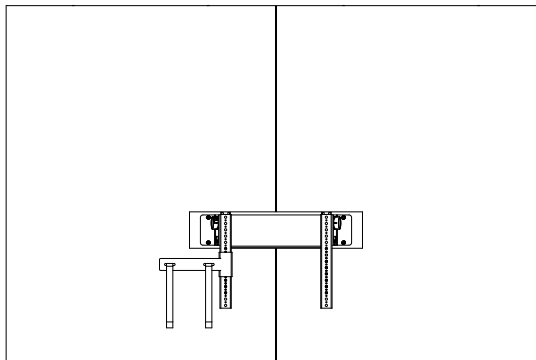

- 2-meter Standard Wall
 - [X9] - None (Automatically selected if WLS is selected)
 - [TGL] - Left (Only available if WLF is selected)
 - [TGR] - Right (Only available if WLF is selected)
 - [TGB] - Both (Only available if WLF is selected)
 - [TGG] - Clear Glass (Automatically selected if WLW is selected)
- 3-meter Standard Wall
 - [X9] - None (Automatically selected if WLS is selected)
 - [TGL] - Left (Only available if WLF is selected)
 - [TGLR] - Left/Right (Only available if WLF is selected)
 - [TGLC] - Left/Center (Only available if WLF is selected)
 - [TGR] - Right (Only available if WLF is selected)
 - [TGRC] - Right/Center (Only available if WLF is selected)
 - [TGC] - Center (Only available if WLF is selected)
 - [TGA] - All 3 (Only available if WLF is selected)
 - [TGG] - Clear Glass (Automatically selected if WLW is selected)

2-meter Standard Wall Side - Upper Panel Options:

- [X9] - None (Automatically selected if [WLW] is selected)
- [2UFSS] - Standard (No monitor cutouts)

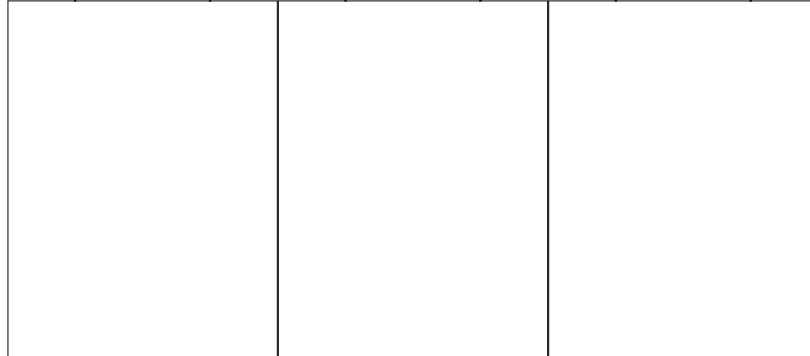

- [2UFMM] - Large Monitor Mount (includes VESA-compatible large monitor mounting bracket). Can only be selected if [EGB] is selected.

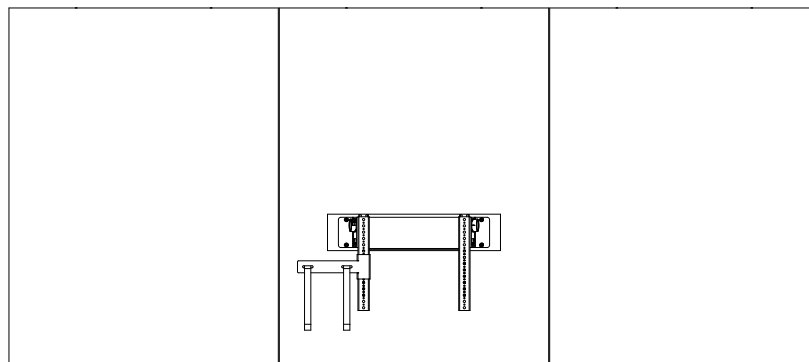

3-meter Standard Wall Side - Upper Panel Options:

- [X9] - None (Automatically selected if [WLW] is selected)
- [3UFSSS] - Standard (No monitor cutouts)

- [3UFSCS] - Large Monitor Mount (includes VESA-compatible large monitor mounting bracket). Can only be selected if [EGLC], [EGRC], [EGC], or [EGA] is selected.

Upper Panel Textile MFG Options:

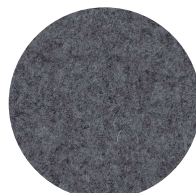

- [X9] - None (Automatically selected if WLW is selected)
- Camira

Upper Panel Textile Color Options:

- [X9] - None (Automatically selected if WLW is selected)
- Blazer, Fairfield
 - Recommended to coordinate with Off White structure finish

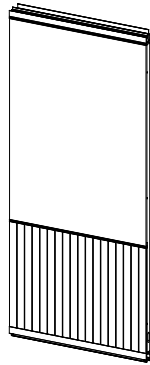

- Blazer, Aberlour
 - Recommended to coordinate with Anthracite structure finish

Small Wall Side

The side walls of the Small units are not true 1-meter panels. They therefore have very limited selections and cannot include infeed walls or interior receptacles.

Example Small Side Tambour Wall

Wall Type

- [WLS] - Standard (only option)

Upper Panel Textile MFG Options:

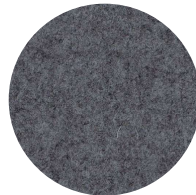

- Camira (only option)

Upper Panel Textile Color Options:

- Blazer, Fairfield
 - Recommended to coordinate with Off White structure finish

- Blazer, Aberlour
 - Recommended to coordinate with Anthracite structure finish

Appendix

- The following pages show all available options for each configurable model and can be used to fully specify Room Collection structures without CET Designer.
- Use the [Models section](#) to determine your starting model.
- One selection must be made in each bold category.
- The rules from this planning guide must be followed to ensure an allowable selection is specified.
