

## Healthcare

### **First Do No Harm: Healthy Building Interiors for Healthcare**

A CEU course brought to you by Carolina, an OFS Company

**Course description:** As climate change accelerates and the evidence mounts about the health impacts of indoor environments, creating healthy building interiors is not only the right thing to do, but it also makes good business sense for both healthcare organizations and design professionals.

In this CEU presentation, you'll learn about the history of healthy buildings and why they matter. You'll also find out about the healthcare industry's impact on climate change, along with how the physical environment of healthcare buildings affects patient and staff health and safety. Finally, you'll learn about the business case for healthy buildings, as well as gain insight on some strategies for designing healthy building interiors.

**Created by:**  
Sara Marberry, EDAC

Presented by a trained member of our team, this course was created by Sara Marberry, EDAC, a healthcare and senior living design knowledge expert who is a leading advocate for how the design of the physical environment can positively affect outcomes. Sara is also available to present this CEU upon request.

**CEU credits:**

- 1.0 IDCEC HSW Sustainability CEU credit (Interior Design Continuing Education Council)
- 1.0 EDAC CEU credit
